Data Audit Box

Data Audit Box (DAB) is designed to analyze and manage the transaction data between VMC and BA/CC. The user can get the whole transaction report in a period of time to audit the cash money of BA/CC on site.

In addition, DAB can print a receipt while connecting to the thermal printer (ICT SP1-V). Also, it can issue an alert via DAB's add-on 3G module to see in case the VMC needs assistance or the stock less than threshold during operating. With a compact size and USB access that can be used as an upgrade port for the DAB, BA, CC, etc, DAB will have an easy and quick installation on vending machine.
