1. Introduction

1-1. Overview

ICT superior security system-NBA bill acceptor, is designed for customers who require safer automatic bill handling transaction. In addition to high security, NBA bill acceptor also includes high acceptance rates, lockable cashbox, bar-code reading function, and quick software update, etc. It would certainly provide you with more than you expect.

1-2. Features

- Four-way bill insertion acceptance.
- High security optical bill detection function.
- Double locks cash box or slide button cash box.
- Bar-code reading function for coupon verification.
- Smart bill box (optional).
- Auto-bill centralizing function.

2. Specifications

General

Acceptance Rate	96% or greater
<i>Note: The acceptance rate excludes notes that are dirty, wet, broken or wrinkled.</i>	
Bill Insertion	Four way acceptable
Transaction Speed	Approx. 5 seconds to stack
Interface	Pulse, RS232 A0, ccTalk, RS232 A1 ICT Protocol

Electrical

Power Consumption	Standby: 0.3 A, 3.6W Operation: 1.25A, 15W Maximum: 3A, 36W
Power Source	12V DC~24V DC (11.4~25.2V DC)
Operation Environment	Operation Temperature: 0°C~50°C Storage Temperature: -30°C~70°C Humidity: 30%~95%RH(no condensation)

Mechanical

Bill Capacity	Approx. 500 bills
Weight	Approx. 4kg (including bill box)
Bill Accepted Width	62~83mm
Outline Dimension	Refer to page. 4
Installation	Indoor

3. Packing List

Main	Bill Acceptor
Accessory	Harnesses: Refer to 5-1 ccTalk male to male connector NBA Installation Guide NBA DIP Switch Setting Guide A Pair of Keys for Bill Box

4. Dimension

U Type Bezel (Part Number: 3RBS-FAC0600X)

5-2. DIP Switch Setting

There are two serial DIP switches which are located in the front of NBA (as 5-2 FIG.01-1). According to different currencies which are used by users, DIP switch settings could be varied to fit users' needs. There's also a serial DIP switch on the base of unit for interface settings (as 5-2 FIG.01-2).

Please refer to "NBA DIP Switch Setting Guide" in the package for more details.

5-3. Software Download and Upgrade

To download and upgrade the software to NBA, the programmer (FP-004) is needed. Please contact ICT to purchase(FP-004) and refer to FP-004 user guide for software download and upgrade information.

Power must be applied to Bill Acceptor after connecting.

6. Maintenance

To make sure the bill acceptor always works smoothly, please clean the internal parts regularly.

To clean the internal parts:

1. Press the buttons on the side of bill path and lift the unit.

6 FIG.01

2. Use a soft, dry cloth, or towel to clean the bill path and sensors.

6 FIG.02-1

6 FIG.02

6 FIG.02-2

Maintenance Notice
(Any improper maintenance will invalidate warranty.)

Recommended	Mild, non-abrasive, soap water.
DO NOT USE	Organic solvent , Alcohol, Volatile liquid.

7. Troubleshooting

7 TABLE 01

LED Flashes		Status	Corrective Actions
Red			
1		Bill jammed.	Remove the jammed bill. (Refer to page 21, as 7 FIG.01)
2		Disable.	Inspect for right DIP switch setting, harness connections, and communication.
3		Recognition module sensor error or bar-code optics module error.	1. Inspect for foreign objects on sensors or bill path and clean. 2. Do the white card calibration with NBA white card. 3. Make sure upper base cover is correctly secured.
4		A stringing attempt has detected.	Inspect for foreign objects on sensors or bill path and clean.
5		Bill box has been removed.	Return bill box back to position.
6		Stacker error or bill box full.	Empty the bill box. (Refer to page 21, as 7 FIG.02)
7		Bill transaction motor error.	Inspect for foreign objects on bill path and clean. Sent the product to service point to maintain.

7 TABLE 02

LED Flashes			Status	Corrective Actions
Red	Green	Blue		
7	2		Note centralized module error.	Inspect for foreign objects on sensors *1 (Refer to page 19, as 6 FIG.02-1) or bill path and they are clean.
3	1		Fish sensor error.	
3	2		I/O sensor error.	
7	1		Solenoid wheel error or anti-fishing hook error.	Inspect for foreign objects on wheels *2 (Refer to page 19, as 6 FIG.02-1) and clean. If solenoid is breakdown, please contact ICT for support.
8			RFID error.	1. Inspect for right DIP switch setting. 2. Make sure the bill box is in position.
2	1		MCU and Barcode communication error.	Re-download bar-code module firmware.
3		1	Re-Calibarte Barcode Reader	Do the calibration with an empty coupon ticket.

If the error can not be solved after corrective actions or it recurs, please contact ICT for technical support.

7 FIG.02-2

When put bill box back to the main unit, it has to ensure the **two reticles** are shown under slide, which means bill box is in the fixed position.
